GUIDELINEGEO

MALÅ Vision

GROUND PENETRATING RADAR SOFTWARE

For processing, visualization and interpretation

Easy, reliable and precise

MALÅ Vision is an easy-to-use, reliable and cloud-based software for precise analysis, processing, interpretation and reporting of GPR projects. It is an efficient way of handling what is needed directly in the field, starting with data collection, ending with reporting and invoicing for the work done.

Create your own free-of-charge user at:
malavision.guidelinegeo.com

System details:	User interface:	Data formats and storage:	Business model:
Works with any operating system	Web based, cloud solution	Secure data management and storage	Three subscription tiers (Community, Single, Team)
Works on any computer or mobile device (>10" recommended)	Intuitive and easy-to-use workflow	Imports all MALÅ GPR data formats and standard projects. Supports import from other GPR vendors.	Community tier is free-of charge
Built on Microsoft Azure cloud platform for guaranteed uptime, access and secure storage	Modern interface, designed for both 2D and 3D data	Exports results and data in common formats	Access and share your data anywhere with anyone
Google Chrome browser recommended	Designed for in-the-field processing and reporting	Software developed continuously and released at regular intervals	Multiple user cooperation through Teams

ABEM | MALÅ *Part of the Guideline Geo success story*

Guideline Geo has been in the geophysics business since 1923 and is the global leader in near-surface geotechnology. Advanced technology ensures practical solutions to everyday, societal and global problems. We deliver total solutions in the technological fields of ground penetrating radar, geoelectrical and electromagnetic measurement, and seismic. The Guideline Geo AB share (GGEO) is listed on Nasdaq First North Growth Market. Our offices and regional partners serve clients in 113 countries.
